SVAKSHA DISTILLARE EDMITSO

Notes to the Financial Statements for the year ended 31st March, 2018

1. CORPORATE AND GENERAL INFORMATION

Svaksha Distillery Limited was incorporated on 12th June, 2014 as a Public Limited Company in India under the Companies Act 2013. It is a subsidiary of BCL Industries Limited (BCL). The Company has been set up to carry out business of distilliers, manufactures, formulators, processors etc.

2. BASIS OF PREPARATION AND PRESENTATION OF FINANCIAL STATEMENT

2.1. Statement of Compliance

These financial statements have been prepared in accordance with the Indian Accounting Standards ("Ind AS") as prescribed by Ministry of Corporate Affairs pursuant to Section 133 of the Companies Act, 2013 ("the Act"), read with the Companies (Indian Accounting Standards) Rules, 2015 (as amended), other relevant provisions of the Act and other accounting principles generally accepted in India.

The financial statements for all periods up to and including the year ended 31st March, 2017, were prepared in accordance with Generally Accepted Accounting Principles (GAAP) in India, which includes the accounting standards prescribed under section 133 of the Act read with Rule 7 of the Companies (Accounts) Rules, 2014 and other provisions of the Act (collectively referred to as "Indian GAAP"). These financial statements for the year ended 31st March, 2018 are the first Ind AS Financial Statements with comparatives, prepared under Ind AS. The Company has consistently applied the accounting policies used in the preparation of its opening Ind AS Balance Sheet at 1st April, 2016 throughout all periods presented, as if these policies had always been in effect and are covered by Ind AS 101 "First Time Adoption of Indian Accounting Standards".

An explanation of how the transition to Ind AS has affected the previously reported financial position, financial performance and cash flows of the Company is provided in Note No. 31 & 32. Certain of the Company's Ind-AS accounting policies used in the opening Balance Sheet differed from its Indian GAAP policies applied as at 31st March, 2016 and accordingly the adjustments were made to restate the opening balances as per Ind-AS. The resulting adjustment arising from events and transactions before the date of transition to Ind-AS were recognized directly through retained earnings as at 1st April, 2016 as required by Ind- AS 101. The financial statements of the Company for the year ended 31st March, 2018 has been approved by the Board of Directors in their meeting held on 21st May, 2018.

2.2. Basis of Measurement

The Company maintains accounts on accrual basis following the historical cost convention, except for followings:

Certain Financial Assets and Liabilities is measured at Fair value / Amortised cost

2.3. Functional and Presentation Currency

The Financial Statements are presented in Indian Rupee (INR), which is the functional currency of the Company and the currency of the primary economic environment in which the Company operates. All financial information presented in INR has been rounded off to the nearest lakhs as per the requirements of Schedule III, unless otherwise stated.

2.4. Use of Estimates and Judgements

The preparation of financial statements in conformity with Ind AS requires judgments, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known/ materialized.

2.5. Presentation of Financial Statements

The Balance Sheet and the Statement of Profit and Loss are prepared and presented in the format prescribed in the Schedule III to the Companies Act, 2013 ("the Act"). The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash flows". The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the financial statements along with the other notes required to be disclosed under the notified Accounting Standards.

2.6. Operating Cycle for current and non-current classification

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013 and Ind AS 1. The Company has ascertained its operating cycle as twelve months for the purpose of current and non-current classification of assets and liabilities.

An asset is classified as current when it is:

- Expected to be realized or intended to sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading:
- > Expected to be realized within twelve months after the reporting period; or

Notes to the Financial Statements for the year ended 31st March, 2018

Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All the other assets are classified as non-current.

A liability is current when:

It is expected to be settled in normal operating cycle;

It is held primarily for the purpose of trading;

- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting

The Company classifies all other liabilities as non-current. Deferred Tax Assets and Liabilities are classified as non-current assets and liabilities respectively.

2.7. Measurement of Fair Values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either;

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Inputs other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 Inputs which are unobservable inputs for the asset or liability,

External valuers are involved for valuation of significant assets & liabilities. Involvement of external valuers is decided by the management of the company considering the requirements of Ind AS and selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

Notes to the Financial Statements for the year ended 31st March, 2018

3. ACCOUNTING POLICIES

A summary of the significant accounting policies applied in the preparation of the financial statements are as given below. These accounting policies have been applied consistently to all the periods presented in the financial statements.

3.1. CASH AND CASH EQUIVALENTS

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short term deposits with an original maturity of three months or less, which are subject to an insignificant risk of change in value.

For the purpose of the statement of cash flows, cash and cash equivalents includes cash on hand, term deposits and other short-term highly liquid investments, net of bank overdrafts as they are considered an integral part of the Company's cash management. Bank overdrafts are shown within short term borrowings in the balance sheet.

3.2. INCOME TAX

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses. Current and deferred tax is recognised in the statement of profit & loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

3.2.1. Current Tax:

Current tax liabilities (or assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the taxation authorities using the tax rates (and tax laws) that have been enacted or substantively enacted, at the end of the reporting period.

3.2.2. Deferred Tax

- Deferred Tax assets and liabilities is measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.
- Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes (i.e., tax base). Deferred tax is also recognized for carry forward of unused tax losses and unused tax credits.
- Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.
- The carrying amount of deferred tax assets is reviewed at the end of each reporting period. The Company reduces the carrying amount of a deferred tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or that entire deferred tax asset to be utilized. Any such reduction is reversed to the extent that it becomes probable that sufficient taxable profit will be available.
- Deferred tax relating to items recognized outside the Statement of Profit and Loss is recognized either in other comprehensive income or in equity. Deferred tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity.
- Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

3.3. PROPERTY, PLANT AND EQUIPMENT

3.3.1. Tangible Assets

3.3.1.1. Recognition and Measurement;

- Property, plant and equipment held for use in the production or/and supply of goods or services, or for administrative purposes, are stated in the balance sheet at cost, less any accumulated depreciation and accumulated impairment losses (if any).
- Cost of an item of property, plant and equipment acquired comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting any trade discounts and rebates, any directly attributable costs of bringing the assets to its working condition and location for its intended use and present value of any estimated cost of dismantling and removing the item and restoring the site on which it is located.

Notes to the Financial Statements for the year ended 31st March, 2018

- In case of self-constructed assets, cost includes the costs of all materials used in construction, direct labour, allocation of directly attributable overheads, directly attributable borrowing costs incurred in bringing the item to working condition for its intended use, and estimated cost of dismantling and removing the item and restoring the site on which it is located. The costs of testing whether the asset is functioning properly, after deducting the net proceeds from selling items produced while bringing the asset to that location and condition are also added to the cost of self-constructed assets.
- If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.
- Profit or loss arising on the disposal of property, plant and equipment are recognized in the Statement of Profit and Loss.

3.3.1.2. Subsequent Measurement:

- Subsequent costs are included in the asset's carrying amount, only when it is probable that future economic benefits associated with the cost incurred will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced.
- Major Inspection/ Repairs/ Overhauling expenses are recognized in the carrying amount of the item of property, plant and equipment as a replacement if the recognition criteria are satisfied. Any Unamortized part of the previously recognized expenses of similar nature is derecognized.

3.3.1.3. Depreciation and Amortization:

- Depreciation on Property. Plant & Equipment is provided under Written Down Method at rates determined based on the useful life of the respective assets and the residual values in accordance with Schedule II of the Companies Act, 2013 or as reassessed by the Company based on the technical evaluation.
- Depreciation on additions (disposals) during the year is provided on a pro-rata basis i.e., from (up to) the date on which asset is ready for use (disposed of).
- Depreciation method, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

3.3.1.4. Disposal of Assets

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between net disposal proceeds and the carrying amount of the asset and is recognized in the statement of profit and loss.

3.3.1.5. Capital Work in Progress

Capital work-in-progress is stated at cost which includes expenses incurred during construction period, interest on amount borrowed for acquisition of qualifying assets and other expenses incurred in connection with project implementation in so far as such expenses relate to the period prior to the commencement of commercial production.

3.3.1.6. Depreciation:

The estimated useful life, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any change in estimate accounted for on a prospective basis.

3.4. REVENUE RECOGNITION

Revenue is recognised based to the extent it is probable that the economic benefit will flow to the company and revenue can be reliably measured regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment, and excludes taxes & duties collected on behalf of the Government and is reduced for estimated customer returns, rebates and other similar allowances.

3.4.1. Sale of Products:

The Company recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the Company and significant risk and reward incidental to sale of products is transferred to the buyer, usually on delivery of the goods.

Notes to the Financial Statements for the year ended 31st March, 2018

3.4.2. Other Income:

- 3.4.2.1. Interest Income: For all debt instruments measured either at amortized cost or at fair value through other comprehensive income (FVTOCI), interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset.
- 3.4.2.2. Other Income: Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably.

3.5. EMPLOYEE BENEFITS

3.5.1. Short Term Benefits

Short term employee benefit obligations are measured on an undiscounted basis and are expensed as the related services are provided. Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within twelve months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period.

BORROWING COSTS

- Borrowing Costs consists of interest and other costs that an entity incurs in connection with the borrowings of funds. Borrowing costs also includes foreign exchange difference to the extent regarded as an adjustment to the borrowing
- Borrowing costs directly attributable to the acquisition or construction of a qualifying asset are capitalized as a part of the cost of that asset that necessarily takes a substantial period of time to complete and prepare the asset for its intended
- Transaction costs in respect of long term borrowing are amortized over the tenure of respective loans using Effective Interest Rate (EIR) method. All other borrowing costs are recognized in the statement of profit and loss in the period in which they are incurred.

FINANCIAL INSTRUMENTS

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

3.7.1. Financial Assets

Recognition and Initial Measurement:

All financial assets are initially recognized when the company becomes a party to the contractual provisions of the instruments. A financial asset is initially measured at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Classification and Subsequent Measurement:

For purposes of subsequent measurement, financial assets are classified in four categories:

- Measured at Amortized Cost;
- Measured at Fair Value Through Other Comprehensive Income (FVTOCI):
- Measured at Fair Value Through Profit or Loss (FVTPL); and
- Equity Instruments designated at Fair Value Through Other Comprehensive Income (FVTOCI).

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

- Measured at Amortized Cost: A debt instrument is measured at the amortized cost if both the following conditions
 - The asset is held within a business model whose objective is achieved by both collecting contractual cash
 - The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the statement of profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade receivables, cash and bank balances, loans and other financial assets of the

Notes to the Financial Statements for the year ended 31st March, 2018

- Measured at FVTOCI: A debt instrument is measured at the FVTOCI if both the following conditions are met:
 - The objective of the business model is achieved by both collecting contractual cash flows and selling the
 - The asset's contractual cash flows represent SPPI.

Debt instruments meeting these criteria are measured initially at fair value plus transaction costs. They are subsequently measured at fair value with any gains or losses arising on remeasurement recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains or losses. Interest calculated using the effective interest method is recognized in the statement of profit and loss in investment

- Measured at FVTPL: FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as FVTPL. In addition, the company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss. Equity instruments which are, held for trading are classified as at
- Equity Instruments designated at FVTOCI: For equity instruments, which has not been classified as FVTPL as above, the company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable. In case the company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment.

Derecognition:

The Company derecognizes a financial asset on trade date only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset

Impairment of Financial Assets:

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS - 109 requires expected credit losses to be measured through a loss allowance. The company recognizes impairment loss for trade receivables that do not constitute a financing transaction using expected credit loss model, which involves use of a provision matrix constructed on the basis of historical credit loss experience. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly

3.7.2. Financial Liabilities

Recognition and Initial Measurement;

Financial liabilities are classified, at initial recognition, as at fair value through profit or loss, loans and borrowings, payables or as derivatives, as appropriate. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Subsequent Measurement:

Financial liabilities are measured subsequently at amortized cost or FVTPL. A financial liability is classified as FVTPL if it is classified as held-for-trading, or it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss. Other financial liabilities are subsequently measured at amortized cost using the effective interest rate method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

Derecognition:

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the counterparty.

Notes to the Financial Statements for the year ended 31st March, 2018

3.8. Earnings Per Share

Basic Earnings per share (EPS) amounts are calculated by dividing the profit for the year attributable to equity holders by the weighted average number of equity shares outstanding during the year. Diluted EPS amounts are calculated by dividing the profit attributable to equity holders adjusted for the effects of potential equity shares by the weighted average number of equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

3.9. Impairment of Non-Financial Assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. An asset is treated as impaired when the carrying cost of the asset exceeds its recoverable value being higher of value in use and net selling price. Value in use is computed at net present value of cash flow expected over the balance useful lives of the assets. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or group of assets (Cash Generating Units – CGU).

An impairment loss is recognized as an expense in the Statement of Profit and Loss in the year in which an asset is identified as impaired. The impairment loss recognized in earlier accounting period is reversed if there has been an improvement in recoverable amount.

3.10. Provisions, Contingent Liabilities and Contingent Assets

3.10.1. Provisions

Provisions are recognized when there is a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are determined by discounting the expected future cash flows (representing the best estimate of the expenditure required to settle the present obligation at the balance sheet date) at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance cost.

3.10.2. Contingent Liabilities

Contingent liability is a possible obligation arising from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events but is not recognized because it is not possible that an outflow of resources embodying economic benefit will be required to settle the obligations or reliable estimate of the amount of the obligations cannot be made. The Company discloses the existence of contingent liabilities in Other Notes to Financial Statements.

3.10.3. Contingent Assets

Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits. Contingent Assets are not recognized though are disclosed, where an inflow of economic benefits is probable.

3.11. Non-Current Assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Non-current assets are not depreciated or amortised.

4. SIGNIFICANT JUDGEMENTS AND KEY SOURCES OF ESTIMATION IN APPLYING ACCOUNTING POLICIES

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances. Information about Significant judgements and Key sources of estimation made in applying accounting policies that have the most significant effects on the amounts recognized in the financial statements is included in the following notes:

Notes to the Financial Statements for the year ended 31st March, 2018

- Recognition of Deferred Tax Assets: The extent to which deferred tax assets can be recognized is based on an assessment of the probability of the Company's future taxable income against which the deferred tax assets can be utilized. In addition, significant judgement is required in assessing the impact of any legal or economic limits.
- Useful lives of depreciable/ amortisable assets: Management reviews its estimate of the useful lives of depreciable/ amortisable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to actual normal wear and tear that may change the utility of plant and equipment.
- Provisions and Contingencies: The assessments undertaken in recognising provisions and contingencies have been made in accordance with Indian Accounting Standards (Ind AS) 37, 'Provisions, Contingent Liabilities and Contingent Assets'. The evaluation of the likelihood of the contingent events is applied best judgement by management regarding the probability of exposure to potential loss.
- Impairment of Financial Assets: The Company reviews its carrying value of investments carried at amortized cost annually, or more frequently when there is indication of impairment. If recoverable amount is less than its carrying amount, the impairment loss is accounted for.
- Fair value measurement of financial Instruments: When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow model. The input to these models are taken from observable markets where possible, but where this not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility.

VOTE 31- TERST TIME ADOPTION OF IND AS - RECONCILIATIONS STATEMENTS

ransition to Ind AS

NOTE 31.1.15

Basis for Preparation

For all period up to and including the year suited March 31, 2017, the Company has propored its financial statements in accordance with generally accepted accounting principles in India (Indian GAAP). These

inuncial statements for the year ended March 31, 2018 are the Company's first annual hal AS financial statements and have been prepared in accordance with list AS

nded 1. March 2017 and in the preparation of an opening hid AS balance sheet at 1 April 2016 (the date of transition). This note explains the principal adjustments made by the Company in restating its financial The accounting policies set out in note I have been applied in preparing the financial adventions for the year ended 31 March 2018, the comparative information presented in these financial statements for the year

ateinent prepared in accordance with previous GAAP, and how the transition from previous GAAP to hid AS has affected the Company's financial position, financial performance and each flows.

NOTE 31, 1, 2:-

Exceptions and Exemptions Applied

lud AS 101 "First-time adoption of Indian uring Standards" (horeinafter referred to us Ind AS 101) allows first time adopters certain examplions from the retrospective application of certain IND AS, effective

for April 1, 2016 opening balance sheer. In preparing these financial statements, the Company has applied the below mentioned optional exemptions and mandatory exceptions

NOTE 31.2.1:

Optional Exemptions Availed

a) Property Plant and Equipment, Intangible Assets and Investment Properties

As permitted by para D5-DNR of hid AS 101, the Company has elected to measure items of property, plant and equipment at fair value and intengible assets at its carrying value at the transition date

NOTE 31.2.21-

Mandatory Exceptions

a) Estimates

adjusted to reflect any differences in accounting policies east may be, should be consistent with estimates made for the same date in accordance with the previous GAAP unless there is objective evidence that those estimates were in error. However, the estimates should be As per para 14 of find AS 101, an entity's estimates in accordance with find AS at the date of transition in find AS at the end of the comparative period presented in the entity's first Ind AS financial statements, as the

at the date of transition as at the end of the econparative period As per para 16 of the standard, where application of Ind AS requires an entity to make certain that were not required under previous GAAP, those estimates should be made to reflect conditions that existed

The Company's estimates under that AS are consistent with the above requirement. You estimates considered in preparation of the financial statement that were not required under the previous GAAP are listed

Fair Valuation of financial instruments curred at FVTPL and/or FVOCI

Determination of the discounted value for financial instruments carried at amortized cost

b) De-recognition of financial assets and liabilities

However, para 9.3 gives an option to the entity to apply the derecepation requirements from a date of its choice if the information required to apply Ind. AS 149 to financial assets and financial habitities derecognized es a result of past immissions was obtained at the initially accounting for those transitions. The company has elected to apply the de-recognition provisions of Ind. AS 109 prospectively from the date of transition to As per jum 87 of find AS 161, an ensity should apply the derecognition requirements in Ind AS 109, "Financial Instruments", prospectively for transactions occurring on or after the date of transition to find AS

c) Classification and measurement of financial assets
Para D8 - 188C of Ind. AS 101 requires an entity to assess classification of financial assets on the basis of facts and diretimatances existing as on the date of transition. Further, the standard permits measurement of in) alsors accounted at amortized cost based on facts and ofreunstances existing at the date of transition if retrospective application is impeacticable.

been done retrospectively Accordingly, the company has determined the classification of financial assets based on facts and circumstances that exist on the date of transition. Measurement of the financial assets accounted at amortized cost has

Level 2 The law value of financial instruments that are not traded in an active market (for example, reided bonds, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable

market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration included in level 3.

NOTE 34:- Contingent Liabilities, Contingent Assets & Commitment

The Company does not have any Contingent Liabilities, Contingent Assets & Commitment

NOTE 35. As on 31st March, 2018, Not worth of the Company has fully croded. Based on the fixed assets of the Company and plans contemplated by the management of setting up a distillery plant, going concern status of the
