October 14, 2025

Dear Sir/Madam

Subject: Registration of 60 TPH Biomass Power Plant under International Renewable Energy Certificates (I-REC) Mechanism and Subsequent Issuance of 50,077 Certificates

We are pleased to inform that BCL Industries Limited has been issued 50,077 International Renewable Energy Certificates (I-RECs) for the renewable power generated during the period January 2025 to September 2025 at its 10 MW captive power plant located at Bathinda, Punjab.

The power is generated using a 60 TPH biomass-fired boiler that utilizes paddy straw as the primary fuel. These certificates have been issued under the globally recognized I-REC Standard, administered by Evident Ev Limited and facilitated in India through the International Carbon Exchange (ICX) Pvt Ltd, a subsidiary of IEX.

Going forward, the Company shall continue to receive I-REC certificates on a pro-rata basis corresponding to the renewable power generation in subsequent periods.

The I-REC certification validates that the electricity generated at our Bathinda facility is produced entirely from renewable and sustainable biomass sources, contributing to reduced carbon emissions, prevention of stubble burning, and alignment with India's clean energy and sustainability goals.

This recognition underscores BCL Industries Limited's continued commitment to sustainability, resource efficiency, and circular economy practices by converting agricultural residue into green energy.

Above information is a general business update to all stakeholders and public at large.

Yours faithfully
For BCL Industries Limited

Ajeet Kumar Thakur
(Company Secretary & Compliance officer)
